CUSTOMER HAPPY WITH Yes

DEFECT STATEMENT

'The team maintained the quality of build right up until the end of the project and the supply chain partners involved were proud to be part of the build'

'Families who arrive are not prepared for this level of quality in this facility and are amazed at what we have and what we can offer them'

'Please communicate to all of the people involved in this project the benefits that this building will give to the 3-400 families a year that will use our facility'

'The design incorporates lots of natural daylight which helps maintain the positive mental attitude which is so important for all when dealing with illness'

'For such a large building, it is sympathetic with its surroundings and has set the benchmark for others to follow'

'The project has created lots of space for our staff as well who will enjoy working here. They will be blown away by what we have achieved here and it really is a nice place to work'

'There is an openness about working with Willmott Dixon'

John Plumer, House Manager - Ronald Macdonald House Charity
